EXPERIENCE

Angular Developer   Oct 2021 – Present
Capgemini India Pvt. Limited

- Developed optimized user interfaces using Angular and Ionic Framework for banking application and improving the performance.
- Added features to the application based on client requirements.
- Developed reusable components for application decreasing time and complexity of development.
- Worked on JS Pdf and Chart JS.
- Collaborated with a team of professionals and migrated legacy applications to the latest tech stack.
- Debugged an application and handled bugs/defects to improve the performance significantly.
- Implemented test case for Angular application increasing code coverage to 80%.
- Actively participated in meetings with scrum masters and client which gained the insights into client requirement and end goals.

TECHNICAL SKILLS

- Angular
- HTML, CSS
- JavaScript/Typescript
- Angular Material
- Ionic Framework

- Bootstrap
- Git/GitHub
- Bitbucket
- Jira

- Sonar
- JS Pdf
- Chart JS

PROJECTS

Weather App (Angular)

- Created Weather App using Angular 15 and Node 18.
- It provides weather details like temperature, humidity, air quality, UV index etc. based on different locations.
- Used icons and images to conditionally render images based on the weather type.
- Integrated API using Rapid API.
- Tools and libraries used such as Git/GitHub, bootstrap, Rapid API, ngx ui loader etc.
